ST. PAUL, Minn. (March 6, 2017) - Braidy Industries Inc. will move its manufacturing operations in the state of Tennessee from its current location in Manchester to a spot in Center, where the company will operate under a new name: OTE. When General Motors exits from the "Powertrain" business – the subdivision responsible for the transmission and driveline components of vehicles – it will not do so with a whimper but with the roar of a new era of automotive progress, said Dan Ammann, who is leading the transformation of GM's engine and transmission business.> The most exciting thing about the Internet is all the attention it draws to an educational video like "The Great Gatsby." Thanks to YouTube, everyone in the world can watch the movie in less time than it takes to order up a pizza. And when it comes to the dozens of educational videos that are posted there each day, it can be a real challenge to find the really great ones. But it's not hard if you know what to look for.
