TURNSTONE is the most versatile landscape conversion software on the market. TURNSTONE is the most versatile landscape conversion software on the market. Featuring the best implementation of the OpenStreetMap data source, TURNSTONE is an absolutely unbeatable map data solution for the creation of walking, driving and biking routes. TURNSTONE - A versatile map data solution for creating walking, driving and biking routes To make finding routes and itineraries easy, we have dedicated an entire menu to that purpose; i.e. the Routes submenu. In there, we provide you with all the necessary tools for creating walking, driving or biking itineraries of almost every length. Creating walking or biking routes is really simple. You only have to specify the starting and the destination, the date and the length of the trek and that's it. TURNSTONE does all the work for you: you will receive all the necessary maps, as well as route search results. Driving routes are also very easy to create: you just have to specify the starting and the destination, as well as the route and the date. Have you ever thought about spending your holidays in a foreign country? It is now finally possible. Simply provide the starting point and the destination, and TURNSTONE will search for the best route! Getting started is quite straightforward: you just have to specify the starting point, the destination and the amount of time you are willing to spend travelling (the latter is entered in the Trip length submenu). Now, all you need to do is relax and let TURNSTONE handle everything else. Of course, if you have multiple routes in mind, you can easily compare them using the Routes Comparison submenu. TURNSTONE has been created to provide you with the best possible route-related data by utilizing the best data available. Software Copyright Submersible Software, Inc. All rights reserved. I've got Adobe Bridge for that but it has only been a while since I've used it and I have forgotten how many features it has. The fact that you can manage your photos without leaving your computer, read descriptions of the photos, create a slideshow, organize them into folders and even print your photos through your computer is amazing. How do I choose a free image editing software that does NOT have a ton of options and is easy to use? Since we are starting a business, are not computer savvy, and want to use something we can understand, was wondering if we could use Photo shop Elements (free for non-profits and small business) to the point of about editing two or three pictures in it (adding maybe a border around them) and then Email the pictures to our printer? It's a really good question, but you should realize that this question is very subjective. Just as one person might think Photoshop or Gimp is the ideal image editor, someone else might think InDesign is the best option. As you mention, there is no one best answer, and you need to carefully consider your priorities to make a decision. For example, some of us might be more comfortable working within a web-based program, while others might prefer to work within a desktop-based program with "traditional" controls. In other words, you need to look at the things that are important to you in choosing an image editor and then figure out which program
